WHITEDOGE PAPER

INTRODUCTION

Launched in March 2022, WhiteDoge Coin one of the fastest growing community in crypto memes. WhiteDoge is on a mission to bring crypto to the average person while also helping save dogs in need. WhiteDoge is built on binance smart chain with extremely fast 5 second block times and cheaper gas fees than ethereum. White Doge Coin has learned a few tricks and lessons from his meme father, Doge. A new crypto birthed by fans of the Doge Meme online community. White Doge seeks to impress his father by showing his new improved transaction speeds & adorableness. He is Hyper-deflationary with static reflection that rewards holders, so more USDT are being automatically added to your wallet each transaction

OUR MISSION

White Doge has a mission: bring DeFi to the masses and NFT's

Decentralized finance, which utilizes technologies to remove

intermediaries, middlemen, and banks from financial markets, is a complicated system to enter into.

Whitedoge primary goal is to make it simple enough for even our father to be able to start earning passive income without having to understand this complicated DeFi world&NFT's.

The first step towards achieving that goal was to create the WhiteDoge token. It is an innovative Reflection Token: one that pays dividends in an already established token instead of our own. Our dividends are paid out in USDT, the premier BSC Swap on the market and a company whose tokens are getting more valuable all the time.

The next step is the release of our 3-click App&NFT's.
